File 10/4 [initials] March 16, 2024
04500

Description: Location for the Taxiway U - Batchplant

We do not object with conditions to the construction described in this proposal provided:

You comply with the requirements set forth in FAA Advisory Circular 150/5370-2, "Operational Safety on Airports During Construction."

As a condition to this Determination, the structure is marked and/or lighted in accordance with (Temporary Construction) Chapter 14 of Advisory Circular 70/7460-1M, Obstruction Marking and Lighting.

Any failure or malfunction that lasts more than thirty (30) minutes and affects a top light or flashing obstruction light, regardless of its position, should be reported immediately to (877) 487-6867 so a Notice to Air Missions (NOTAM) can be issued. As soon as the normal operation is restored, notify the same number.

Use the lowest boom height that is required to get the work accomplished while minimizing potential hazard to VFR aircraft operations at KPHX.

Lower the crane boom when not in use, between sunset and sunrise and during periods of reduced visibility (Ceiling less than 1000 feet AGL and/or visibility less than 3sm.)

PHX ATCT must be notified 30 minutes prior to the crane raising and once the project is completed, 602-306-2675

NOTAMs are required to identify the construction equipment location

For current Advisory Circulars go to www.oeaaa.faa.gov

Further, you should contact the Airport Traffic Control Tower (ATCT) Watch Supervisor at 602-306-2675 prior to the crane(s) being raised for purposes of establishing a procedure to have the crane(s) immediately lowered upon request of the ATCT. When the crane(s) is no longer needed and has been permanently lowered, you should contact the ATCT at the telephone numbers given above and log back into your registered E-file account to provide the Flight Data Center (FDC) with notification that the NOTAM can be cancelled.

This determination does not constitute FAA approval or disapproval of the physical development involved in the proposal. It is a determination with respect to the safe and efficient use of navigable airspace by aircraft and with respect to the safety of persons and property on the ground.

In making this determination, the FAA has considered matters such as the effects the proposal would have on existing or planned traffic patterns of neighboring airports, the effects it would have on the existing airspace structure and projected programs of the FAA, the effects it would have on the safety of persons and property on the ground, and the effects that existing or proposed manmade objects (on file with the FAA), and known natural objects within the affected area would have on the airport proposal.

This determination expires on March 11, 2026 unless:

(a) extended, revised or terminated by the issuing office.

(b) the construction is subject to the licensing authority of the Federal Communications Commission (FCC) and an application for a construction permit has been filed, as required by the FCC, within 6 months of the date of this determination. In such case, the determination expires on the date prescribed by the FCC for the completion of construction, or the date the FCC denies the application.

NOTE: Request for extension of the effective period of this determination must be obtained at least 15 days prior to expiration date specified in this letter.

If you have any questions concerning this determination contact Tim Morrison (602) 792-1069 tim.morrison@faa.gov. On any future correspondence concerning this matter, please refer to Aeronautical Study Number 2024-AWP-6626-NRA.

Tim Morrison
